

How

it works

1. We capture physiological signals from a patient at home, via multi-vendor medical devices, targeting chronic diseases

2. Captured data is anonymized, converted to a health standard (FHIR) and robustly and securely transmitted to Azure, via our IoT sensor gateway

3. Under DRM regime, data can be consumed by our health partner's EHR, via our cloud services API

4. Data can trigger clinical alerts designed for the prevention, early detection and management of chronic diseases

5. Data can be consumed by patients, friends and family through our app

6. Data analytics is performed in the cloud using machine learning

What others are

Saying

"BIX app and remote monitoring technology is helping our Humanitarian Organization expanding the reach of home care support, to elderly living alone in Lisbon"

João Alvelos, President of Cruz de Malta, Portugal

"To interface through the BIX platform allows us to come closer to true personalized healthcare for people with diabetes.

Rogério Ribeiro, Principal Researcher of Education and Research Center, APDP - Diabetes Portugal

"BIX provides state of the art Ambient Assisted Living tools for diabetes disaster prevention and real time remote monitoring, with effective data analysis.

Marta Gonçalves, Customer Service & Corporate Operations Lead, Evolute

Meet our solutions for Companies

INSURANCE

Improve your insurance offerings or design new services targeting preventive care and early detection of chronic diseases

CHRONIC DISEASES PATIENT ASSOCIATIONS

Improve your value proposition for your associates with our BIX bundle solutions

LOCAL HEALTHCARE CENTERS

Integrate BIX Home Healthcare Service APIs in your IT Health infrastructure and monitor your patients closely

HOSPITALS & CLINICS

Increase your offering by adopting remote health monitoring at home for patients with chronic diseases

CHARITIES & SENIOR HOUSING

Offer innovative services that let caretakers and relatives monitor their elders remotely

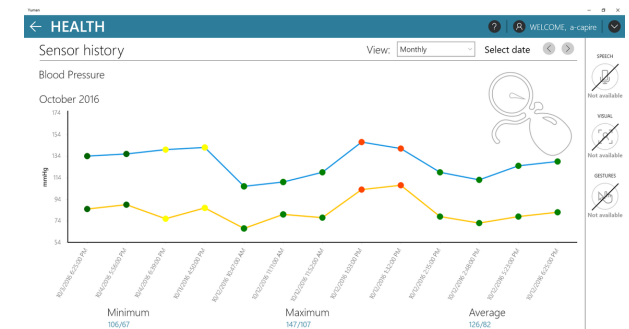

Meet our low cost IoT sensor

Gateway

and our

App

They work with the following

Products

Blood Pressure Sensors

Activ8rlives Blood Pressure monitor, Beurer Blood Pressure BM 85, Beurer Blood Pressure BM 57, Fora Blood Pressure P20

Glucose Sensors

OneTouch Verio Flex®, OneTouch Select Plus Flex®

Wearables

Microsoft Band, Microsoft Band 2

Weight Scales

Fora Weight Scale W310
